

Industrial AI
Homework 01 Fall 2026
Due Sep. 21 (before 12:30 pm)

This is an **individual** assignment. Make a survey on the following topics:

- Industrial 4.0
 - Internet-of-Things (IoT)
 - Cyber-physical Systems
 - Smart Manufacturing
 - Large Language Models
- Review the backgrounds and fundamental technologies behind those five terms.
- Describe how industrial big data analytics can contribute to realizing those systems.
- Discuss the potential of Large Language Models (LLMs) applied in Industry

Related reading materials are on ELMS, and please try to find more by yourself.

Submission:

Please submit **one-word document (3-5 pages)** and **one five-minute presentation file** as a summary of the survey to ELMS. A few individuals will be randomly selected to **present your document in the Sep. 21 class**; the presentation will be evaluated and is worth 40% of the Homework 01 grade.
